

propel^{Rx} Half Label Comparison – Vial Label

PROPEL RX

PHARMACLIK RX

- 1 **Prescriber** – the prescriber’s salutation and name have been moved under the prescription number (authorization number in British Columbia).
- 2 ***NEW* DIS ID** – In Newfoundland and Labrador, this is the Create Rx ID from the Rx Detail EHR tab. If the network is down when the label is printed, this field is blank. This does not print for shrink labels.
- 3 **Fill Date** – the Fill Date has been moved to below the patient’s name.
- 4 **Drug Name** – Trade and Trade & Innovator options for the drug name have been removed to adhere to labelling standards. The drug name continues to print according to the settings in the Drug Folder, Group Folder, and Rx Detail. Mixture prescriptions will always display the generic and trade name. The generic name is replaced with TallMan if it exists in the Drug Folder (not applicable for mixtures).

In New Brunswick, the MFR also prints beside the strength. In Nova Scotia, for insulin prescriptions, the trade name always prints on the first line and the generic name on the second.
- 5 **Quantity** – the Quantity has been moved to the same row as the dosage form, manufacturer, and DIN. For Owe Balance labels, this is the amount that’s being dispensed for the Owe Balance. For methadone prescriptions, this is the number of millilitres per dose up to 1 decimal place.

-
- 6 **Refills Expire/No Refills After** – in Nova Scotia and Newfoundland and Labrador, the Rx expiry date must print on the label; the Rx Life Expiry preference is defaulted to Written Rx Date and disabled, and the Print Rx Expiry preference must be set to either *# Refill(s) Expire MMM DD, YYYY* or *No Refills After MMM DD, YYYY*. In all other provinces, the Print Rx Expiry preference can be set to None in addition to the aforementioned options.
 - 7 **Qty Left/Rep** – Qty Left prints instead of Rep if the **Use Qty Left for Repeats** preference is ON. Qty Left always prints if a partial fill is left. In Manitoba, Qty Left always prints.
 - 8 **SIG** – the SIG has been moved to the bottom of the vial label. The maximum number of characters remains the same (193 mixed or 187 uppercase). The text shrinks as needed to fit within 3 lines.
 - 9 ***NEW* Barcode** – a prescription barcode prints vertically on the right side of the label. Accuaccount barcodes now print on an auxiliary label instead of the vial label.
 - 10 ***NEW* Label Indicator** – the label number and the total number of labels are indicated in the bottom right corner if a split is specified in Rx Detail or Packaging (format: label #/total # of labels). For owe balances, the label indicator reflects the number of owe balance labels printed. If there is no split, this field does not appear. This does not print for methadone, Additional Instructions, supplementary, immunization, or Hold labels. This field can be updated with an Amend or Amend Next.

The generic name is replaced with TallMan if it exists in the Drug Folder (not applicable for mixtures).

In New Brunswick, the MFR also prints beside the strength. In Nova Scotia, for insulin prescriptions, the trade name always prints on the first line and the generic name on the second.
- 2 ***NEW* Area** – indicates the name of the area that the patient belongs to in the group.
- 3 **Qty Left/Rep** – Qty Left prints instead of Rep if the **Use Qty Left for Repeats** preference is ON in Half Label Preferences. Qty Left always prints if a partial fill is left. In Manitoba, Qty Left always prints.
- 4 ***NEW* Refills Expire/No Refills After** – in Nova Scotia and Newfoundland and Labrador, the Rx expiry date must print on the label; the Rx Life Expiry preference is defaulted to Written Rx Date and disabled, and the Print Rx Expiry preference must be set to either **# Refill(s) Expire MMM DD, YYYY** or **No Refills After MMM DD, YYYY**. In all other provinces, the Rx expiry date does not print on the Daily Laser vial label.
- 5 ***NEW* Total Paid** – in Ontario, the price of the prescription appears here.

propel^{Rx} Half Label Methadone Supplementary Label (Not Applicable to Daily Laser)

PROPEL RX

QAAZPIREGNL01
QA Propel NL Req (999) 999-9999
2300 Meadowale Blvd, Corner Brook, NF A5N 5P9

Keep out of reach of children
Keep refrigerated
May be toxic or lethal if ingested by a child or adult other than the intended patient. Accidental ingestion is considered a medical emergency and requires immediate medical attention

PHARMACLIK RX

None

When a prescription is processed using a methadone Drug Folder, one methadone supplementary label prints for each prescription vial label. If **Methadone supp label** is OFF in Label Preferences, the methadone supplementary label does not print. This label also does not print for methadone mixture prescriptions. Please note, the wording on the methadone supplementary label may vary by province.

propel^{Rx} Half Label Comparison – Hard Copy Top Half

Lines are now used to divide the different sections of the hard copy. When additional information exists in Propel Rx that can be printed on the hard copy, a “...” notation appears after the last letter for the field.

The layout of the Owe Balance hard copies now mimics regular hard copies.

- ¹ ***NEW* Fill Type** – indicates the Fill Type (e.g., NEW, REFILL, REAUTH, HOLD, RTF = Refusal to Fill) for the prescription. For Owe Balances, an *OWE* indicator appears instead.
- ² ***NEW* Status** – indicates the prescription or label status (e.g., *RB* = Rebill, *AMD* = Amend, *RP* = Reprint, *CAN* = Cancelled, *TRN* = Transferred). If multiple actions were performed on a prescription, the most recent status is printed.
- ³ ***NEW* LAN** – indicates the primary language set in the Patient Folder Preferences tab.
- ⁴ **Auto Refill Enrollment** – indicates the Auto Refill enrollment status for the patient instead of the prescription. Statuses include A = Auto Refill Enrolled and AD = Auto Refill Declined.
- ⁵ **Drug Name** – Trade and Trade & Innovator options for the drug name have been removed to adhere to labelling standards. The drug name continues to print according to the settings in the Drug Folder, Group Folder, and Rx Detail. Mixture prescriptions will always display the generic and trade name. The generic name is replaced with TallMan if it exists in the Drug Folder (not applicable for mixtures).

-
- 7 In Nova Scotia, for insulin prescriptions, the trade name always prints on the first line and the generic name on the second.
 - 6 **Quantity** – for Owe Balances, this is the quantity being dispensed for the Owe Balance. For methadone prescriptions, this is the number of millilitres per dose up to 1 decimal place.
***NEW* Item #** – this is the item number for the pack size used to fill the prescription. If multiple packs are used, this does not appear.
 - 8 **Watermarks and Refrigeration** – indicates if a drug is High Alert (***NEW***), Opioid, or Trial (Alberta). If a drug is refrigerated, a snowflake icon (***NEW***) prints beside the watermarks, if any.
 - 9 ***NEW* Formulary Designation** – for banner stores, this indicates the primary or secondary designation of the drug on the banner formulary.
 - 10 **Pack Size** – if more than 1 pack size is used to fill a prescription, up to 2 pack sizes can now print here. When this occurs, a Multi header prints followed by each pack size and its On Hand value. For mixture prescriptions, the PK# and On Hand do not print. For Owe Balances, the On Hand does not print.
 - 11 **LOT and EXP/BUD** – this is the lot number and expiry date entered in Packaging or if Packaging is off, the Rx Detail Extended tab. If multiple packs are used to fill a prescription, the lot number and expiry date of the earliest expiring pack size prints. For mixture prescriptions, BUD prints instead of EXP. For Owe Balances, the lot number and expiry date must always be entered manually.

 Refused Reason: Had Before Other:

- 12 **Attachments** – the Attachments indicator has been moved into the prescription section of the Hard Copy.
- 13 **Qty Left/Rep** – Qty Left prints instead of Rep if the **Use Qty Left for Repeats** preference is ON. Qty Left always prints if a partial fill is left. In Manitoba, Qty Left always prints.
- 14 ***NEW* Qty Packaged and Qty Owed** – indicates the quantity packaged for the current fill and the quantity owed, if any. If nothing is owed, Qty Packaged is the same as Qty. For mixture prescriptions, the Qty Owed will always be blank.
- 15 ***NEW* Time** – indicates when the prescription was packaged (if Packaging is ON), filled (if Packaging is OFF), or placed on Hold. For Cancelled prescriptions, this field does not appear. Time is updated on Rebills and Amends.
- 16 ***NEW* Interval and Rx Expiry** – indicates the interval and prescription expiry date as entered in the Rx Detail Extended tab.

Prev DIN and ***NEW* Prev SIG** – the DIN and SIG of the previous prescription in the same chain prints below the Interval and Rx Expiry, if applicable. The Prev DIN header replaces the REPL header that used to print.

- 17 **Special Warnings** – special warnings for the prescription print on 2 lines. The first line can print *ADD’L INSTRUCTIONS*, *DELIVERY*, *Prev. On Hold*, *Pain Management* (methadone), or *Refusal to Fill – Not Dispensed*. The second line can print Dbl Co (Double Count), Snap Caps, C-PACK, packager device name, or  (PrescribeIT™).

When Packaging is ON, the initials of the user who confirmed the Double Count and/or Snap Caps print beside the warning (***NEW***). For Owe Balances and when Packaging is OFF, the initials do not print for Double Count and/or Snap Caps.

- 18 ***NEW* Waived** – indicates the amount waived for the prescription following adjudication, if any.

***NEW* SSC** and **INTV** – if Special Service Codes and/or intervention codes were used to bill the prescription, they are printed to the left of the gross profit. The bill codes will be listed along with the Special Service Codes and/or intervention codes that were used.

- 19 **Verification Boxes** – the verification boxes have been aligned horizontally and renamed to correspond with Propel Rx Workflow: DE = Data Entry, PKG = Packaging, TECH = Technical Validation, and CLIN = Clinical Review.

In British Columbia, 6 boxes are available which are named as follows: Entry Check, Allergy, P.Net, DT Issues, Final Check, and Consult.

For Hold prescriptions, the PKG box does not print. For Owe Balances, only the PKG and TECH boxes print.

- 20 **Dialogue** – if Dialogue was completed before the label was printed, the Dialogue checkboxes (e.g., Accepted, Patient) would be pre-selected on the label.

- 21 **Barcode** – the prescription barcode has been moved to the bottom right of the Hard Copy.

Narcotic Pickup By Patient Pickup
 Agent Delivery

Date: _____ Time: _____

Patient Signature _____

This barcode can be used for batch scanning.

A narcotic pickup receipt can now be printed for Half labels when the **Narcotic Pickup Receipt** preference is ON in **Label Preferences**. The narcotic pickup receipt prints in the following situations:

- When a narcotic prescription is filled
- When a narcotic prescription label is printed
- When an Owe Balance label for a narcotic prescription is printed

Narcotic pickup receipts do not print for Hold or Cancelled prescriptions.

When printed, the narcotic pickup receipt appears on a separate page from the prescription Half label. You can configure the printer settings for this receipt in **More (...)** > **System** > **Half Label Narcotic Pickup Receipt**. Please note, the Prompt checkbox in System does not apply to this receipt.
